Sierra Freedom Conference:

The Sierra Freedom Conference is a gathering of thoughtful, freedom-minded community and business members who want to expose medical, societal, environmental, and economic issues, occurring under the mainstream media fueled, “pandemic” event. It will provide a venue that allows attendees to get information from professionals who are not funded by big pharma/agrochemical, telecommunications, military, or other industries that influence opinion over fact.

It is a two day conference that includes a range of presenters, and will have booths covering health, constitutional, and environment. The morning and evening mixers allow participants to speak with each other and presenters in a relaxed, open environment. Topics covered at the conference include: constitutional rights and the law, health, vaccines/surveillance, psychology, economic and environmental impacts, related technologies and their impacts, the history and projection of it and more.

Speakers include:

Sheriff Richard Mack: CSPOA - Constitutional Sheriff and Peace Officer’s Association

- Presenting on Constitutional Law

Laura Minard: RN, BSN, NC-BC

- Allopathic vs Naturopathic, Concerns with Vaccines, Covid Experience

Dr. Jim Meehan MD Osteopath/Natural Medicine

- Covid Illness, vaccines, patient rights

Dr. Mark McDonald MD PhD

- Psychological impacts of Covid - Medical Law

Michael Blanshan: Children’s Health Defense/RFK Jr., Doctors WARN

- Covid Impacts on Children/Vaccines/5G Health Impacts

Gregg Lien: Attorney - Law Offices of Gregg Lien

- 5G Environmental Law, Constitutional Law

Nikki Florio: Bee Heroic

- Pollinators and Environment, Technological parallel between environmental destruction and pandemic - related technologies and industries

Dr. Marvin Herndon PhD - Nuclear Physicist/Geoengineering Research

- Geoengineering Impacts on Environment and Warfare

Dane Wingington: Geoengineering Watch

- Geoengineering Impact on Environment - Focus: Weather Whiplash, Fires and Agriculture

Shannon Weil: Educator/Speaker

- Biodynamic Farming

Jeanette Waldow: Apple Bistro Restaurant

- Constitution Rights and Responsibility - How to Remain Open Under Constitutional Law

Ken Paige: Frair Tuck's/Nevada County Restaurant Coalition (NCRC)

- Creating Coalition Through Community

Tony Roman: Basilico's Pasta a Vino

- Your Rights to Remain Open / Having Happy Supportive Customers

### **Sierra Freedom Conference**

Sunday and Monday - February 21/22, 2021

Apple Bistro Restaurant

2740 Hwy 50

Placerville, CA 95667

Article:

### **The Great Covid Calamity: The Pandemic That Wasn't**

The Greatest Crime

The greatest crime against humanity and the environment was exposed in 2020, but it's design was decades in the making. In order to take down global economies, the environment, societies, and free and open media, must be whittled away, and social indoctrination must have a strong foothold on open societies.

There have been many false flags - events that occur that have been predesigned to change opinions or paths of societies - throughout history, but it was 9/11 which fanned the flames of those underlying the current *pandemic* event.

9/11 Wake Up

9/11 was a wake up call for many. The three towers that fell on the day September 11, 2001 - towers 1,2, and 7 - all in the same manner, were the first and only steel framed structures to fall into their own footprints as the result of fire. Buildings 1 and 2 had planes hit, and building 7, had a small corner office fire. All three fell in a manner often

seen in controlled demolitions. The incident incited a war that has continued for nearly two decades. 9/11 allowed for a fast tracked invasion of Iraq; a country who had nothing to do with the “terrorist attack”, and initiated the trying and murder of Saddam Hussein. Iraq had nothing to do with the towers coming down, but this country is filled with resources that the US commercial and military investors would profit from. Utilization of fear-mongering media helped drive many Americans into a compliant, unquestioning state. Repetition of phrases like terror/terrifying/terrorist, weapons of mass destruction/WMD’s and use of color coding (green, yellow, orange, red) and more, kept those same Americans in a constant state of stress, and willing to do anything - even hate friends, neighbors, and business men and women whom they thought were middle east spies, or terrorists - to stop more “terrorist attacks”. This was the apex and launching point for destruction of civil liberties.

## Today

Today, mainstream media (MSM) and the current administrations (Trump/Biden) uses similar tactics via repetition of phrases. These include: pandemic, covid 19, death, China, stand together, Masks/ for your protection, SARS-COV-2, Fauci, cases, cases, etc. With the additional “luck” of occurring in an election year, Pharmaceutical/Telecom funded MSM has been able to divide the country and keep people’s eyes off of the “prize” - mass social indoctrination and vaccination with intent to genetically alter and track each person who gets it. Political tactics were used to create a theatre of “good cop/bad cop” with many on each side refusing to look behind the curtain. Those who have taken a peek know, that both candidates have financial ties to big pharma, telecommunications, China and other industries and countries who are cashing in on pandemic related investments; pharma, mining, telecom, military, agrochemical etc..

## 2020 Environment

2020 marked the 50th anniversary of Earth Day; a single day chosen each year to highlight and protect the environment. 2020 was a year that exposure of some of the most dangerous technologies and products impacting Earth, would have occurred; and that a tidal wave of force to stop agrochemical companies, 5G/IoT, and geoengineering, was happening. Currently, Earth is experiencing a mass extinction event. The sixth in history, but the first to occur due to a species aware of it’s impact and destructive nature - with the power to stop it. The losses of several hundred plant and animal species each day, means that within a handful of years there will not be “enough” for everyone if something isn’t done to stop the drivers.

## Economy

Today’s economic growth in most areas has come to a screeching halt. Middle America is being wiped out, and, concurrently, America’s millionaire and billionaire investors are increasing wealth at a rate never before seen in America’s history. Billionaires like Elon Musk who has received hundreds of millions of dollars in 5G/Satellite/Military contracts,

is concurrently working on AI/transhumanistic technologies to replace slow, less useful, human workers.

Billionaires, like Bill Gates, Jeff Bezos, Charles Schwab and other *pandemic profiteers* invest in pharmaceutical/agrochemical/chemical, telecom/military, energy/mining and other industries, fund media; essentially a “pay to play” forum in the global pandemic media circus. Bill Gates, who is a primary funder of the World Health Organization, NIH and CDC, has never taken so much as a CPR class, but is featured as a global voice in health. This, in essence, practicing medicine without a license. He is a major investor in the aforementioned industries and has invested over \$10 billion in vaccine development; standing to make \$200 billion. He is certainly not interested in stopping the pandemic lie; and indeed, helps perpetrate it by sharing half truths on the very news and health media stations and outlets, he owns and invests in. He and other profiteers are not interested in health, but rather, control.

## Psychology

Psychologically, many American adults and children are becoming depressed; overwhelmed by thoughts of dying from a virus that they have a near 100% chance of living through. An “infection”, unbeknownst even to themselves, that many have already had. Social indoctrination can be seen throughout the world on a variety of levels from religious to political. Current indoctrination is being perpetrated through fear.

Starting with isolation, then moving our “voice” and identity, and finally creating obedience through conformity is all occurring. This is done via lockdowns, defacing through use of masking, and inciting fascism through fear of contagion.

## Psycho-physiological Control

Physiological control of societies cannot occur without psychological control. The major psychological operations (psy-ops) started around 9/11 when the telecom/computer industries created a way to get a computer into the hands of the bulk of populations throughout the world. Though marketed as an entertainment and learning technology, underlying issues included the creation of “addicts” to these machines via games (for children), and social media (for adults). In the decades that followed, billions of people became so addicted that mothers couldn’t breastfeed and simply look into their baby’s eyes without being near her phone, teens could not go through a day without touching their phones hundreds of times, and toddlers were being baby-sat by computer or television screens with constant bombardment of muted colors and thoughtless programs.

Common Core curriculum - developed by Bill Gates - was newly utilized in schools. A highly repetitious, test based form of learning that inhibits free thinking, and confines independent cognitive growth. A form of education where inquiry is out of the question.

Common Core, combined with a new “be-nice-everybody-gets-a-prize-so-no-one-feels-bad mentality, “politically correct” school system, and reality-show television, has created the bulk of an entire generation of people who have lost the ability to think critically and utilize deductive reasoning skills.

This indoctrination has allowed governments - not just in socialist countries but here in our own - to manipulate citizens into thinking the coming fascist tactics are good for them.

Social media, advanced technology, and life in the 21st century has overwhelmed many. Computers were supposed to make life easier, but in the past decade, people nearly stopped altogether using them as a learning device, and started using them as social surrogates; allowing themselves to be led away from live gatherings, and thinking socializing is healthy to communicate from a distance. It wasn't occurring fast enough for those who want to control lives and global industries.

Hence, the mask and vaccines.

Masking an entire society has many benefits, but your health, is not one of them.

Masking:

- Depletes oxygen intake and forces you to rebreathe exhaled carbon dioxide and carbon monoxide
- Forces you to rebreathe bacteria and viruses which accumulate in lungs, heart and nasal cavities
- Acts as a muzzle - keeping many people silent because they do not want to “rock the boat” with friends, families, or places of business where they want to keep things copasetic.
- Acts as a form of militaristic unification
- Keeps people from thinking for themselves, and allows them to be led

Vaccines:

According to Merriam - Webster, *vaccine* is: **a preparation that is administered (as by injection) to stimulate the body's immune response against a specific infectious disease.**

- The current Covid-19 vaccine is being promoted as something better than the body's own immune system; for a virus which has a 99% + survival rate for healthy people (as with the other 380 trillion viruses in our bodies).
- It is being promoted as something that is needed to be taken even if someone has already had the virus/illness, is perfectly healthy and will never transmit the virus
- The covid vaccine is not a conventional vaccine but a type of gene therapy. It has a 95%+ efficacy in stopping Covid 19 (symptoms), but not SARS COV-2 (viral transmission); Unlike with other vaccines, with the mRNA covid vaccines you can still

- carry and spread the virus; and because you do not exhibit symptoms, you can be coerced into wearing the mask indefinitely.
- The current vaccine is part of ID 2020/tracking/Covid Passport (CoviPass) push. Current societal control in communist China is based on tracking through these technologies.
  - Once vaccinated, every cell in your body will be modified. The genetic marker is patented. As with genetically engineered foods, plants, bacteria, viruses and animals, the owner of the patent essentially owns the product; in this case, it is those who are vaccinated; including future lineage, as the haploids (sperm and egg) will be marked, is as well.

## Total Control

The historical path to the current event - also known as the Great Reset - has been coordinated and carefully controlled for years but has taken certain technologies to attain. Control of everyone - and every thing - needs a vector to connect it all, and that is found in the Internet of Things (IoT).

The IoT can only occur if it's foundational technology is available. That technology is 5G (5th Generation). 5G cellular technology, unlike 2G - 4G, is being partnered with by the federal government. It is a technology whose grade of frequencies is extremely dangerous to biological and human health. In order for 5G to be successful and allow for the surveillance and sharing of information on every square inch of Earth, it must create an electromagnetic blanket or "electro-smog", where transmission can occur, effectively, uninterrupted. The mmWaves used in 5G do not travel far so millions of new towers, and support systems like 5G streetlamp, have been erected all over the world. In addition to this thousands of satellites are being put into Earth's low orbit regions, and floating cell towers are being used in oceans.

Because micro/mmWave transmission can be interrupted by weather, control of the weather must also be attained. This foundational weather technology is called geoengineering. Geoengineering is defined as "deliberate large scale intervention of Earth's natural systems, to counteract climate change" (according to Oxford University's Geoengineering Program), however, this technology is not utilized simply for climate mitigation programs to "stop global warming", but also used for commercial and military uses; primarily, the latter. With about a dozen technologies used to manipulate large scale climatic/weather programs, it is the aerosol programs which are the most visible. Aerosol geoengineering has occurred for over 70 years and is so prevalent today that in 2017 the American Meteorological Society (AMS)/NOAA listed "New Cloud Types" to include both them, and the clouds created by adding frequencies from ground and space based transmitters. These "homogenitus/homomutatus clouds - made generally of nano-particulates of aluminum, barium, strontium, and other elements - break up existing moisture in the atmosphere, and create "better" conditions for 5G/IoT communications and surveillance projects.

## Conspiracy Theories

*Conspiracy Theory* is a term designed to shame inquisitive people into stopping their investigations of certain topics - that everyone from governments to elitists, to corporations, would prefer to have “covered up”. The difference between a “conspiracy theorist”/“inquisitive person or researcher” who lived only a few decades ago, and one who lives today, is that the “theoretical”, or manner of guessing, can be more easily taken out, and proof can be definitive. Computers are extraordinary research tools providing information that was once unattainable. So, in essence: today, there are only those who wish to educate themselves, and those too lazy to look.

Power to the People. Power to the Planet.

A growing number of people are waking up from the *American dream*. Understanding the scope of issues involved with the pandemic is critical to creating forces to stop those who are socially and financially profiting from it, *and* in re-creating a more thoughtful, conscious, and intellectually superior one.

People must continue to gather, and plan, new communities and partnerships. This needs to be done quickly. Partnerships with primary leaders (8 or so) meeting frequently, can help accelerate projects through sharing information.

Communities should include, but not be limited to having:

- Integrated, open and closed-loop indoor/outdoor organic food systems; these will create great sources for diet and medicine
- Have independent well/water; government owned water is tainted and fracking has polluted aquifers
- Have an independent trading/bartering/coin/monetary system
- Educational programs that promote useful professions that are harmonious with healthy societies.

Halting dangerous technology is not something “someone” should do. It is something you need to do. These technologies will NOT allow you to have an independent community. They will NOT allow you or your family to live, un-surveilled. They will NOT allow you to be in control:

- People must work to stop 5G/IoT industries with thoughtful, creative action: legal and independent.
- People must work to stop geoengineering. This can be done by learning about the impacts and organizations working to stop them at different state/national/international levels.
- People must be forthright with older children, and leave “old America” behind.
- Indoctrination of social behavior and actions must go in the bin where they belong; re-connecting with nature and society at a “live” level.

Taking time to enjoy life is essential. Life without technology might seem at first to be a punishment to some, but it's a simple way to get back to basics. Being in the moment with family, friends, a pet, or alone can all be very enjoyable. Telling and listening to stories and family histories, allows an understanding that is not available "on-line". Physical presence and appreciation of smells, sights, sounds, and the essence of living things, is far more valuable - and pertinent - today, than ever. Build your Self, share what you know.

The great pollen nation - from wind and water pollinated plants, to the scope of animals which pollinate our farms, deserts, prairies, and forests - are needed for humans to survive. We have evolved to the degree that we have because of them. They provide us the most nutrient-dense foods on Earth, and keep plants alive which have created ecosystems we need for survival. If we work to protect them by stopping the aforementioned technologies, we can easily save ourselves.

Earth is an extraordinary place. Our great planet needs us, and we must take a stand against tyrannical government, industries and bullying billionaires.

Live bravely. Live gratefully. Be heroic.
